Brief Summary of Discussion (200 words max): This is our sixth meeting. During this meeting, we finalized the colour scheme for our app's interface and discussed on how we were going to explain the flow of our interfaces. We also discussed on minor changes to be made in each of our interface. After that, we went through the MoSCoW prioritisation table and decided to include a section for our coarse user stories to make it more clear and understandable. We then worked on the evaluation plan and finalised the tasks we were going to add. Lastly, we briefly discussed about our next deliverable to gain an initial understanding of it.	

Agreed Actions:

- We agreed and finalized the design and colour scheme for our low fidelity prototype
- Agreed to make changes and further improve our MoSCoW prioritisation table

Issues:

There were minor misalignments in a few part of our interface's layout design, which were promptly solved.
